Expanded Coverage for Preventive Care
Under National Health Care Reform

Most health plans can no longer require cost sharing for certain preventive services as a result of national health care reform. In addition, coverage must be provided for some preventive services, such as screenings, immunizations, and other types of care, as recommended by the federal government. The U.S. Department of Health and Human Services also issued guidelines to ensure that all women have access to preventive health services necessary for women’s health and wellbeing. These guidelines require health plans and health issuers to cover the recommended women’s preventive health services without charging a copayment, co-insurance, or deductible for in-network services. Non-grandfathered health plans and health issuers must cover these services without member cost sharing.

Sample Services with No Cost Sharing

- Routine adult exams
- Routine GYN exams
- Certain family planning services
- Routine hearing exams
- Routine vision exams
- Certain prenatal services
- Routine pediatric exams
What This Means for Members and Accounts

Blue Cross Blue Shield of Massachusetts offers the following services with no member cost share when they are administered by network providers:

- Routine adult exams
- Routine GYN exams
- Certain family planning services
- Routine hearing exams
- Routine vision exams
- Certain prenatal services
- Routine pediatric care
- Physical therapy to prevent falls in community-dwelling adults ages 65 and older

Women’s preventive health services recommended by the Department of Health and Human Services include the following types of preventive services:

- Annual well-woman visits
- Screening for gestational diabetes
- Human papillomavirus (HPV) DNA testing
- Counseling for sexually transmitted infections
- Counseling and screening for human immunodeficiency virus (HIV) infections
- Contraceptive methods and counseling
- Breastfeeding support, supplies, and counseling
- Domestic violence screening

Preventive Services with No Cost Sharing

Blue Cross Blue Shield of Massachusetts covers the preventive services listed in the following charts at no cost to our members when the services are provided by a network provider. Some of these services may also be covered as part of routine physical exams, such as checkups, routine gynecological visits, or well-child exams.

1. The list of preventive care services and tests covered with no member cost share is subject to change upon the issuance of additional guidance from the federal government pursuant to the Patient Protection and Affordable Care Act. Blue Cross Blue Shield of Massachusetts has updated its products, and certain plan designs may have expanded preventive benefits beyond what is required by national health care reform. Some grandfathered or self-insured plan designs may have a more limited selection.

2. Certain limitations may apply. For a complete description of benefits, please refer to your subscriber certificate, account agreement description, or plan materials.
